ROHAN KAPOOR

MACHINE LEARNING / AI ENGINEER

Delhi, India | rohan.kapoor@example.com | +91 92222 34567

PROFESSIONAL SUMMARY

Machine learning engineer with 3 years of experience developing NLP, retrieval, and generative AI applications. Skilled in Python, SQL, data processing, model evaluation, vector databases, APIs, and cloud deployment. Experienced in turning unstructured documents into reliable structured information and building practical AI systems with measurable evaluation criteria.

SKILLS

Python, SQL, JavaScript, Bash, FastAPI, Flask, React, PyTorch, scikit-learn, NLP, embeddings, RAG, vector search, Gemini API, prompt engineering, evaluation, classification, PostgreSQL, MongoDB, Redis, Docker, Git, AWS, MLflow, pandas, NumPy

EXPERIENCE

Machine Learning Engineer — DataNova AI | Delhi | 2023–Present

Developed document intelligence pipelines extracting entities, skills, dates, and structured fields from resumes and job descriptions.

Built retrieval-augmented generation workflows using embeddings, vector search, prompt templates, and Gemini models.

Designed offline evaluation datasets and metrics for extraction accuracy, retrieval quality, and response consistency.

Developed FastAPI services with validation, logging, caching, and asynchronous processing for AI workloads.

PROJECTS

Resume Intelligence Engine | Python, FastAPI, Gemini, PostgreSQL

Implemented resume parsing and job-description analysis with structured JSON schemas and validation.

Generated skill-gap reports and personalized technical interview questions from candidate evidence.

Knowledge Assistant | Python, embeddings, vector database, Gemini

Built a RAG prototype that retrieves technical documentation before generating grounded answers.

EDUCATION

M.Tech. Artificial Intelligence — IIIT Delhi | 2020–2022 | CGPA 8.9/10

B.Tech. Computer Science — Delhi Technological University | 2016–2020 | CGPA 8.5/10
